

Patient Pamphlet for the Use of Medical Cannabis Flowers

Medical Cannabis products are defined as "Illicit Drugs", and use thereof is permissible for medical purposes only. Read this entire pamphlet carefully prior to using the product. This pamphlet contains summary information. For any additional questions, you should seek consultation from a physician or a pharmacist.

Active ingredients: Cannabis flowers, CBD, THC (according to the composition noted over the package).

For more information about titration:
https://www.health.gov.il/hozer/mmk154_2016.pdf

It is prohibited to transfer this product or any portion thereof to any other person. It might be harmful to them even when it appears that they are suffering from a similar medical illness. In addition, doing so constitutes drug trafficking, which might result in losing the license and in a criminal record.

Therapeutic group: Cannabis based treatment.

This product is not to be used if you have a sensitivity (allergy) to the active ingredient, or any of the additional components.

Consult with a Physician Prior to the Use in any of the Following Events:

- You have a history of addiction to a medication or any substance whatsoever
- If you currently or recently have been using other medications - including prescription drugs and nutritional supplements - inform the physician or pharmacist of such use
- If you are suffering from a liver or kidney disease.

Specific Warnings Related to the Use of the Product:

- Cannabis consumption may lower blood glucose. We recommend having a snack or candy, or a cold sweetened soft drink near you before beginning use. We recommend monitoring blood glucose levels at the start of use.
- If you are travelling to other countries, you need to check whether it is legal to be in possession of this product in those countries, including countries through which you pass on your way to the destination country. This product is a drug, subject to legal supervision. It is possible that its legal status may differ between various countries
- Do not drive or operate dangerous machinery during use, or when the active substance or decomposition products of the substances are present in your bloodstream.
- This product is not to be taken in the dark or insufficient lighting conditions
- Upon using Cannabis flowers type product, in the form of cigarettes for smoking, all precautions required in the event of use of fire are to be taken
- Each Cannabis product is designated for a specific pharmacologic administration. The indication of the administration method defined for the product should not be deviated. For example: flowers should not be swallowed. Swallowing a Cannabis flowers might induce undesirable immediate side effects, such as anxiety, delusions and even loss of consciousness
- These guidelines do not substitute a consultation with the physician or pharmacist.
- Do not use the product if you are pregnant, planning a pregnancy, or breastfeeding.

Method of Use of Medical Cannabis Flowers:

The flowers should be evaporated by using a suitable vaporizer. The flowers can also be smoked.

Dosage:

The dosage is to be defined in compliance with the physician's instructions only. In the event of any doubt, you must verify the proper dosage with a physician or a pharmacist. The recommended dosage should not be exceeded. In the absence of any other instruction from a physician, the minimal dosage that achieves the purpose of use should be taken.

Side effects:

As with any other product, the use of Cannabis may induce side-effects for some users. Do not be alarmed upon reading the list of side-effects. It is possible that you will not suffer from any of those. If any one of the side-effects is becoming worse over time, or in the event you are suffering from a side-effect not listed in this pamphlet - you must consult a physician. These side-effects usually pass shortly after the adjustment period to the product. These side-effects may last for up to 72 hours after taking the product. A regular use in high dosages, may result in diminished cognitive functions.

Common side-effects:

- Feeling light headed and slight dizziness
- Unstable pulse (elevated or decreased)
- Decrease in blood pressure and sugar levels
- Increased appetite
- Headaches
- Stomach aches
- Fatigue
- Diminished coordination
- Lack in stability
- Dryness of mucosal body organs such as the eyes and mouth
- Cognitive effects such as loss of short term memory, decrease a coherent line of thought and changes in time and space perceptions
- Coughing (while smoking or evaporation)
- Redness of the eyes
- Anxiety.

Side-Effects Upon Chronic Use:

- Dependency
- Higher risk of suffering from chronic bronchitis and lung dysfunction
- More common psychotic symptoms and disorders in patients with a personal or family history of psychotic phenomena
- Decrease in the hormone levels of FSH, LH, PROLACTIN and GH
- Disorders in the digestive system as well as disorders in the electrolytic balance. Special caution should be taken in cases of patients who suffer from renal failure
- Use over a period of 10 year or longer may result in permanent impairment in cognitive function.

Side-Effects Commonly Induced by Over-Dose, which Demand Special Attention:

Syncope, substantial changes in blood pressure, blood sugar levels or speed of breath. High dosage of the substance might, in certain cases, for people with pre-inclination, induce

temporary manifestation of psychotic conditions, anxiety or hallucinations.

Drugs interactions:

Cannabis should be used with caution or avoided altogether in combination with the use of any of the following medications:

- Blood sugar level reduction medications** - a hyper-reduction in blood glucose values may occur, which will require adjusting their dosage upon the beginning or modification of the Cannabis treatment.
- Blood pressure reduction medications** - a hyper-reduction in blood pressure values may occur, which will require adjusting their dosage.
- Symptomatic effect medications** - including preparations for local treatment of the nose and eyes, which have the potential for systemic absorption. There is an increased possibility for the appearance of tachycardia or increased blood pressure.
- CNS system depressants** - medications for sleep disorders, for tranquilization, alcohol, opiates. Enhancement of sensations of sedation, dizziness, ataxia, loss of balance, and risk of falling may occur. Increased risk of driving and operating heavy machinery.
- Muscle relaxation effect medications** - increase in muscle weakness and risk of falling may occur.
- Anticholinergic effect medications** - for example, tricyclic anti-depressants, anti-allergenic anti histamines. Increase in the potential for the occurrence of tachycardia and dizziness.
- Anticoagulants containing warfarin (Coumadin)** - INR index values may increase.

Storage conditions:

- Product must be stored in dry and cool conditions
- Product must be protected from exposure to light, sources of heat and fire
- Prevent poisoning! The "Cannabis products" must be kept in a safe location outside the reach of children and/or babies, and in this way, you will prevent poisoning. In the event of an over-dose was taken, or if a child accidentally swallowed the medicine, you must immediately refer to the Emergency Unit in a nearby hospital, and bring the product's package with you
- Do not induce vomiting without explicit orders from a physician
- Do not use the product after the expiration date noted over the package
- Store in a safe location
- The product should not be disposed of into the sewage system or trash. Ask the pharmacist regarding the appropriate manner of disposal of un-used Cannabis products.

The Manufacturer and its Address:

Breath of Life Cannabis Manufacturing of Medical Product Ltd., Revalim

QUALITY DISCLAIMER Our facilities released this product after cultivating it under proper IMC-GAP growing conditions, processing and packing it under appropriate IMC-GMP production conditions, and shipping it to its destination under suitable IMC-GDP distribution conditions. This was all in accordance with Israeli IMC standards published on the website of the Ministry of Health's Medical Cannabis Division, which are subject to periodic quality assessments several times a year by the Ministry of Health and/or someone on its behalf. To preserve the quality of the product, it must be kept under the proper conditions throughout its life. The product should be stored in its original packaging and stored in a dark, dry place below 25°C. Care must be taken to close the package to prevent light and moisture penetration. Sampling for batch data determination is conducted in a laboratory approved by the Ministry of Health according to the regulatory guidelines for standard compliance and product marketing approval. The sampling method, approved by the Ministry of Health, is based on a scientific and Statistical rationale representing the batch. The sampling results comply with the Ministry of Health's terms for product marketing. At the same time, this is a botanical product (an agricultural crop), where the variability in its components may be greater than the component data appearing on the packaging. The product itself is influenced by a variety of factors such as temperature, humidity, time and storage conditions; as such, conditions for maintaining cannabis products are factors that can have a significant impact on product quality. BOL Pharma invests considerable effort into providing you a suitable high-caliber product leaving you completely satisfied. If for any reason (since this is an agricultural crop) you have doubts as to product quality, please contact your local pharmacy so we may provide an appropriate response and a professional review of the issue.

أعراض جانبية ناتجة، عادة، عن جرعة زائدة، تستلزم تطهيرًا خاصًا: الإيماء، تغيرات كبيرة في ضغط الدم، في النبض، في مستوى السكر في الدم، أو في وترة التنفس. جرعة عالية من المادة من الممكن - في حالات معينة - أن تؤدي لدى الأشخاص أصحاب الميل المسبق إلى اندفاع مؤقت لحالات نفسية، خوف، أو هلوسة.

التفاعلات بين الأدوية: يجب الحذر أو الامتناع عن إعطاء القنب الهندي (الكانابيس) مع الأدوية التالية:
